Professional Summary

Frontend-focused Full-Stack Developer with ~3 years of experience building **scalable, API-driven web applications** using **React, Node.js, REST, and GraphQL**. Experienced in **multi-tenant systems, role-based access control, analytics dashboards, and production testing**. Strong foundation in **software engineering principles, clean architecture, and performance optimization**, with additional **academic and practical exposure to Machine Learning and AI**.

Professional Experience

MERN Stack Developer

Cyranix LLC | *Sept 2025 – Present*

Tickflow – Multi-Tenant Ticket Management System

- Contributing to an **enterprise-grade, multi-tenant ticketing platform** with tenant isolation and role-based access control.
- Designed and integrated **secure REST APIs** supporting ticket lifecycle workflows and internal operations.
- Built and maintained **analytics dashboards** delivering real-time operational insights for internal stakeholders.
- Improved **backend performance, scalability, and modularity** through refactoring and optimized API design.
- Actively involved in **product testing**, validating API flows, frontend integrations, and edge cases prior to release.
- Collaborate with backend engineers and product stakeholders to ensure feature stability across multiple iterations.

Yazerd – Garage Selling Platform (MERN Stack)

- Developing a **production-ready marketplace application** enabling users to list, manage, and sell products.
- Implemented responsive and reusable UI components with React and Tailwind CSS. Integrated backend services for listings, user flows, and management features.

Servacy – On-Demand Home Services Platform

- Built **GraphQL APIs using Apollo Server and Node.js** to support real-time service discovery and booking workflows.
- Designed schema-driven data access patterns to improve frontend efficiency and maintainability.
- Collaborated on frontend–backend contracts to ensure scalable and reliable service interactions.

Full-Stack Developer (MERN)

Self-Driven Projects & Freelance

- **XhafeexHop – E-Commerce Platform**
  Built a responsive e-commerce application using React, Tailwind CSS, and Node.js, focusing on UI performance, modular component design, and maintainable frontend architecture.
- **School Management System (MERN Stack)**
  Designed and developed a scalable system to manage attendance, teachers, and financial records.
- **Course Management System (Hope-to-Skill Clone)**
  Developed a full-stack learning platform using React, Tailwind CSS, Node.js, and Express.js, emphasizing reusable UI patterns and backend scalability.

Technical Skills

Frontend

- React.js, JavaScript (ES6+), HTML5, CSS3
- Tailwind CSS, Material UI, Bootstrap
- State Management: Redux, Context API

Backend & APIs

- Node.js, Express.js
- REST APIs, GraphQL (Apollo Server)

Databases & Tooling

- MongoDB, MySQL, Mongoose
- Git, GitHub, Postman

Machine Learning (Learning Track)

- Python, NumPy, Pandas
- TensorFlow, Scikit-learn
- CNNs, Transformers, Matplotlib

Machine Learning & AI Foundations

- Machine Learning fundamentals (classification, regression, clustering)
- Python using **Jupyter Notebook / Google Colab**
- Data annotation, preprocessing, and feature extraction
- Algorithms: **Naïve Bayes, One-R, KNN, Decision Trees, Linear Regression, SVM**
- **Clustering techniques**
- **Neural Networks (Perceptron)**
- Introductory exposure to **CNNs, RNNs, Transformers, and Generative AI**
- Model evaluation metrics (accuracy, precision, recall)
- Basic **Flask-based ML web application integration**

Leadership & Activities

- **Communication Director – ACM Society**
  Led communication and coordination for technical sessions with industry experts and managed multi-event execution.
- **Academic & Event Leadership** ○ Coordinated and managed **two Final Year Project (FYP) review events**, facilitating structured evaluations by **industry and academic experts**.
  - Acted as a liaison between student teams, reviewers, and faculty, ensuring effective technical discussions and feedback documentation.
- Demonstrated ability to manage **multiple responsibilities in parallel**, including handling **two FYP teams within a single academic year**.

Education

Bachelor of Science in Software Engineering (BSSE)
University of Central Punjab, Lahore
Mar 2023 – Apr 2027
CGPA: **3.06**

Languages

- English (Professional)
- Urdu (Native)
-
